

The Vivarium Problem-Solving Hackathon:

Learn to hack problems at your facility

Together with your peers, you will:

- Share common pain-points with managing a vivarium.
- Learn how to identify and solve problems faster than you ever imagined.
- Put in practice what you learn through interactive simulations.
- Discover what you need to be successful in implementing real change.
- Understand how to uncover the root cause of age-old problems.
- Become more flexible in processing information and meeting obligations.
- Defend improvement ideas and projects with concrete data analysis.

Facilitators:

Jarrold Nichol, CLSSBB

*Lean Program Manager
McGill University*

Eric Georgelos,

*Director of Operations
